By inflicting damage upon their body parts or the surface of their body, their life force will become exposed. If you attack them at this time, you will be able to damage their life force itself.

Oni are able to regenerate their body parts and body surfaces. You can use the Ritual of Purification to prevent body parts from regenerating, rendering their life force vulnerable at all times.

The Ritual of Purification can prevent destroyed body parts from regenerating.

Body surface & body parts

In addition to their life force, large Oni have what is known as surface resilience and body part resilience. You can press SELECT to use the Eye of Truth and see the surface resilience, body part resilience and life force of the Oni.

① Surface resilience (upper bar)

This is the resilience of the outer layer of the Oni's body. It will decrease as you attack the Oni, and when it reaches 0, the Oni will lose its surface resilience (surface destruction). However, it will recover after a set period of time has elapsed.

② Life force (lower bar)

This is the Oni's life force. When it reaches 0, the Oni will be defeated.

③ Body part resilience

This is the resilience of each body part. By attacking a body part, its color will change from white to yellow to red, and if you continue to attack, you will destroy it (body part destruction). These parts can regenerate under certain circumstances, but you can use the Ritual of Purification to prevent them from doing so.

Large Oni Status

You can only deplete the Oni's surface and body part resilience, but not its life force.
